

## Android Developer, Software Engineering

Conyers, GA- REF #2353

### OUR TEAM

Acuity Brands is the North American market leader and one of the world's leading providers of innovative lighting systems. Our LED lights are computing, sensing, network connected platforms, and everywhere there are people, there are lights. We are perfectly positioned to enable the world of IoT, and we have plenty of awesome projects to work on! We are driving the industry's transformation to smart lighting; redefining how people live, work and play.

### ABOUT THE ROLE

We're seeking talented and enthusiastic Android Developers whose primary responsibility is software architecture and development. Additional responsibilities include participation in project time/task estimation, code and architecture reviews, documentation of system architecture and a supporting role for all phases of the development life-cycle (project definition, process mapping, architecture, coding, acceptance testing, installation, turnover to support, etc.).

### WHAT YOU WILL DO

- Understand user requirements and translate the requirements to Android applications
- Design, develop, test, and maintain web based applications
- Interact with project managers, UI designers, software engineers, and other applications developers
- Actively participate in systems architecture to create a new innovative solutions
- Utilize Agile/Scrum methodologies for software development

### ABOUT YOU

- You are passionate and optimistic.
- You are Innovative. You challenge assumptions.
- You encourage those around you to create their best work.
- You work for the best interest of the group at all times.
- You have unwavering personal integrity and work ethic.
- You are proactive.
- You graciously give and receive feedback
- You buy into the scrum methodology, and demand a project oriented, collaborative, and very positive environment.

### WHAT'S IN IT FOR YOU

- The chance to work on meaningful projects aspiring to improving people's lives
- Great equipment including 4k monitors MacBooks or Surface Books / Surface Pros
- 4-Day work week (4-10, also 5-8 available, if preferred – we are flexible)
- Casual dress code (we are talking shorts!)
- Creative and collaborative environment
- Company paid sports leagues and wellness program
- On-site game room (ping-pong and Xbox)

- Free coffee and tea
- Commuter shuttle bus (limited areas)
- 

**And now the ordinary benefits:**

- Health, Dental, Vision, Life, AD&D, 401K, HSA Accounts, Stock Purchase Plans
- and more!

**REQUIRED SKILLS**

- Bachelor's degree in CS, MIS or equivalent.
- 3+ years of proven experience with Android Application Development
- Strong Java skills with extensive knowledge of the Android SDK
- General knowledge of software engineering practices
- Basic understanding of databases (specifically SQL Server).
- Understanding of Agile software development.
- Excellent verbal and written communication skills.

**NICE TO HAVE**

- Experience with HTML5, CSS3, JavaScript, and jQuery a plus
- Experience with cloud or mobile services (specifically Microsoft Azure) a plus

**WHY IS ACUITY BRANDS A GREAT PLACE FOR SOFTWARE DEVELOPMENT?**

- Our software team is a strategic part of the direction of our company
- Our company is a very profitable market leader and provides financial stability
- You will work with highly talented, fun and supportive teams
- We believe in a healthy work/life balance
- We produce quality software that you can be proud of
