Back-End Web Developer, Software Engineering

Conyers, GA

OUR TEAM

Acuity Brands is the North American market leader and one of the world's leading providers of innovative lighting systems. Our LED lights are computing, sensing, network connected platforms, and everywhere there are people, there are lights. We are perfectly positioned to enable the world of IoT, and we have plenty of awesome projects to work on! We are driving the industry's transformation to smart lighting; redefining how people live, work and play.

ABOUT THE ROLE

We're seeking talented and enthusiastic Server-Side or Back-End Web Developers whose primary responsibility is software architecture and development. Additional responsibilities include participation in project time/task estimation, code and architecture reviews, providing support for junior developers, documentation of system architecture and a supporting role for all phases of the development life-cycle (project definition, process mapping, architecture, coding, acceptance testing, installation, turnover to support, etc.).

WHAT YOU WILL DO

- Understand user requirements and translate the requirements to web applications
- Design, develop, test, and maintain the server-side components of our platform
- Interact with project managers, UI designers, software engineers, and other applications developers
- Actively participate in systems architecture to create new innovative solutions
- Utilize Agile/Scrum methodologies for software development

ABOUT YOU

- You are passionate and optimistic.
- You are Innovative. You challenge assumptions.
- You encourage those around you to create their best work.
- You work for the best interest of the group at all times.
- You have unwavering personal integrity and work ethic.
- You are proactive.
- You graciously give and receive feedback
- You buy into the scrum methodology, and demand a project oriented, collaborative, and very positive environment.

WHAT'S IN IT FOR YOU
- The chance to work on meaningful projects aspiring to improving people's lives
- Great equipment including 4k monitors Surface Books / Surface Pros or MacBooks
- 4-Day work week (4-10, also 5-8 available, if preferred – we are flexible)
- Casual dress code (we are talking shorts!)
- Creative and collaborative environment
- Company paid sports leagues and wellness program
- On-site game room (ping-pong and Xbox)
- Free coffee and tea
- Commuter shuttle bus (limited areas)

And now the ordinary benefits:
- Health, Dental, Vision, Life, AD&D, 401K, HSA Accounts, Stock Purchase Plans
- and more!

REQUIRED SKILLS

- Bachelor's Degree in Computer Science, MIS or equivalent.
- 3+ years of proven experience with Back-End Web Development
- Experience using modern frameworks and tools like .NET and Node.JS
- Proficient C# and JavaScript skills with extensive knowledge of debugging practices
- Basic understanding of front-end web development with JavaScript, HTML5, and CSS3
- General knowledge of software engineering practices
- Basic understanding of databases (relational or non-relational)
- Basic understanding of user authentication and authorization
- Understanding of Agile software development
- Excellent verbal and written communication skills

NICE TO HAVE
- Experience with cloud or mobile services (specifically Microsoft Azure)
- Expertise in Azure RDBMS and other modern data stores (e.g. SQL Server, Table Storage, Blob Storage, Redis Cache)
- Proficiency in using Microsoft Visual Studio Team Services
- Typescript

WHY IS ACUITY BRANDS A GREAT PLACE FOR SOFTWARE DEVELOPMENT?
- Our software team is a strategic part of the direction of our company
- Our company is a very profitable market leader and provides financial stability
- You will work with highly talented, fun and supportive teams
- We believe in a healthy work/life balance
- We produce quality software that you can be proud of
