

devDBA (Software Developer/DBA), Platform Architecture

Conyers, GA

OUR TEAM

Acuity Brands is the North American market leader and one of the world's leading providers of innovative lighting systems. Our LED lights are computing, sensing, network connected platforms, and everywhere there are people, there are lights. We are perfectly positioned to enable the world of IoT, and we have plenty of awesome projects to work on! We are driving the industry's transformation to smart lighting; redefining how people live, work and play.

ABOUT THE ROLE

We're seeking talented and enthusiastic DevDBAs responsible for, as part of a team, directing the architecture, configuration, integration, monitoring and support of on premise and/or cloud based data related to custom developed applications and associated resources. The ideal candidate will have cloud based platform experience, Microsoft Azure or AWS, in addition to exposure to on premise DBMS and .NET development. This person will be focused on designing and developing data related assets and processes in cloud and on mobile devices as implementing health and performance monitoring for all environments. Software development experience is highly desirable. Continuous research, evaluation, and recommendations of technologies will also be required.

WHAT YOU WILL DO

- Support always-available cloud-based data platforms.
- Support application development teams develop data centric applications.
- Work with DevOps to develop automation to quickly and rapidly deploy data related assets.
- Use monitoring tools to find problems, resolve and/or escalate to development.
- Build and manage dev/test data environments, assisting developers in debugging application issues using tools.
- On-going evaluation of new technologies.
- Contribute to the creation of system support documents.
- Leverage scripting to build required automation and tools.
- Design solutions within our security and privacy guidelines.
- Learn on the job and explore new technologies with little supervision

ABOUT YOU

- You are passionate and optimistic.
- You are Innovative. You challenge assumptions.
- You encourage those around you to create their best work.
- You work for the best interest of the group at all times.
- You have unwavering personal integrity and work ethic.
- You are proactive.
- You graciously give and receive feedback
- You buy into the scrum methodology, and demand a project oriented, collaborative, and very positive environment.

WHAT'S IN IT FOR YOU

- The chance to work on meaningful projects aspiring to improving people's lives

- Great equipment including 4k monitors MacBooks or Surface Books / Surface Pros
- 4-Day work week (4-10, also 5-8 available, if preferred – we are flexible)
- Casual dress code (we are talking shorts!)
- Creative and collaborative environment
- Company paid sports leagues and wellness program
- On-site game room (ping-pong and Xbox)
- Free coffee and tea
- Commuter shuttle bus (limited areas)
-

And now the ordinary benefits:

- Health, Dental, Vision, Life, AD&D, 401K, HSA Accounts, Stock Purchase Plans
- and more!

REQUIRED SKILLS

- Bachelor's Degree- Management Information Systems (MIS) or Computer Science (CS)
- 3+ years DBA experience plus the education listed
- Azure and/or AWS data related technology experience
- Data storage tuning and troubleshooting experience
- PowerShell (or similar) scripting/development experience
- Software Development background
- Clear written and verbal communication skills

NICE TO HAVE

- Exposure to blob, big data and relational storage
- .Net development experience
- Mobile application development
