

## DevOps Engineer (Cloud Engineering), Platform Architecture

Conyers, GA- REF #2337

### OUR TEAM

Acuity Brands is the North American market leader and one of the world's leading providers of innovative lighting systems. Our LED lights are computing, sensing, network connected platforms, and everywhere there are people, there are lights. We are perfectly positioned to enable the world of IoT, and we have plenty of awesome projects to work on! We are driving the industry's transformation to smart lighting; redefining how people live, work and play.

### ABOUT THE ROLE

We're seeking talented and enthusiastic DevOps Engineers who will be responsible for, as part of a team, directing the architecture, configuration, integration, monitoring and support of on-premise and/or cloud based hosting of custom developed applications and associated resources. The ideal candidate will have experience with cloud based platforms, like Microsoft Azure or AWS, in addition to exposure to on-premise website and application infrastructure. This person will be focused on streamlining and automating the development and deployment processes in cloud, hybrid, and on-premise implementations as well as implementing health and performance monitoring for all environments. PowerShell scripting experience is highly desirable. Continuous research, evaluation, and recommendations of technologies will also be required.

### WHAT YOU WILL DO

- Support an always-available cloud-based platform
- Support application deployments, building new systems and upgrading and patching existing ones
- Develop automation to quickly and rapidly deploy websites, web jobs, etc.
- Use monitoring tools to find problems, resolve and/or escalate to development, meet/exceed our SLAs
- Build and manage dev/test environments, assisting developers in debugging application issues using tools
- Participate in the building of tools and processes to support the infrastructure
- Contribute to the creation of system support documents
- Leverage scripting to build required automation and tools
- Operate the platform within our security and privacy guidelines
- Learn on the job and explore new technologies with little supervision

### ABOUT YOU

- You are passionate and optimistic.
- You are Innovative. You challenge assumptions.
- You encourage those around you to create their best work.
- You work for the best interest of the group at all times.
- You have unwavering personal integrity and work ethic.
- You are proactive.
- You graciously give and receive feedback
- You buy into the scrum methodology, and demand a project oriented, collaborative, and very positive environment.

## **WHAT'S IN IT FOR YOU**

- The chance to work on meaningful projects aspiring to improving people's lives
- Great equipment including 4k monitors MacBooks or Surface Books / Surface Pros
- 4-Day work week (4-10, also 5-8 available, if preferred – we are flexible)
- Casual dress code (we are talking shorts!)
- Creative and collaborative environment
- Company paid sports leagues and wellness program
- On-site game room (ping-pong and Xbox)
- Free coffee and tea
- Commuter shuttle bus (limited areas)
- 

### **And now the ordinary benefits:**

- Health, Dental, Vision, Life, AD&D, 401K, HSA Accounts, Stock Purchase Plans
- and more!

## **REQUIRED SKILLS**

- Management Information Systems (MIS) or Computer Science (CS) background
- 3+ years DevOps related experience Azure and/or AWS account administration
- Website tuning and troubleshooting experience
- Networking and application load balancing concepts and technologies
- PowerShell (or similar) scripting/development experience
- Understanding of protocols/technologies like HTTP, SSL, LDAP, ASP.Net, SQL, HTML, XML, JSON
- Clear written and verbal communication skills

## **NICE TO HAVE**

- Exposure to system log analytic/monitoring tools like Splunk, New Relic, Application Insights, System Center
- .Net development experience
- Mobile application support including application store releasing

## **WHY IS ACUITY BRANDS A GREAT PLACE FOR SOFTWARE DEVELOPMENT?**

- Our software team is a strategic part of the direction of our company
- Our company is a very profitable market leader and provides financial stability
- You will work with highly talented, fun and supportive teams
- We believe in a healthy work/life balance
- We produce quality software that you can be proud of
