

Quality Assurance Automation Engineer, Platform Architecture

Conyers, GA- REF #?

OUR TEAM

Acuity Brands is the North American market leader and one of the world's leading providers of innovative lighting systems. Our LED lights are computing, sensing, network connected platforms, and everywhere there are people, there are lights. We are perfectly positioned to enable the world of IoT, and we have plenty of awesome projects to work on! We are driving the industry's transformation to smart lighting; redefining how people live, work and play.

ABOUT THE ROLE

We're seeking talented and enthusiastic Software Quality Assurance Automation Engineers who are interested in testing new and innovative web and mobile applications. Facilitate the ability of Software Architecture development teams to deliver quality applications throughout the construction process by the development and execution of automated test plans and cases. This position will be responsible for designing the testing frameworks used by all teams.

WHAT YOU WILL DO

- Design end-to-end testing strategies for development teams
- Develops, implements and executes test plans and test strategies
- Develops Test Scripts for Automation
- Prepares Test reports and test summaries
- Develops, codes and tests automation scripts from specifications
- Read and understand software requirements via story walk-throughs
- Writes documentation that describes installation and operating procedures
- Participates in systems design with development teams
- Interfaces with development teams and/or customers to clarify requirements
- Ensures coordination between and across inter-related projects
- Writes effective and thorough bug reports and verifies bug fixes
- May perform manual testing as needed to support development teams

ABOUT YOU

- You are passionate and optimistic.
- You are Innovative. You challenge assumptions.
- You encourage those around you to create their best work.
- You work for the best interest of the group at all times.
- You have unwavering personal integrity and work ethic.
- You are proactive.
- You graciously give and receive feedback
- You buy into the scrum methodology, and demand a project oriented, collaborative, and very positive environment.

WHAT'S IN IT FOR YOU

- The chance to work on meaningful projects aspiring to improving people's lives
- Great equipment including 4k monitors MacBooks or Surface Books / Surface Pros

- 4-Day work week (4-10, also 5-8 available, if preferred – we are flexible)
- Casual dress code (we are talking shorts!)
- Creative and collaborative environment
- Company paid sports leagues and wellness program
- On-site game room (ping-pong and Xbox)
- Free coffee and tea
- Commuter shuttle bus (limited areas)

And now the ordinary benefits:

- Health, Dental, Vision, Life, AD&D, 401K, HSA Accounts, Stock Purchase Plans
- and more!

REQUIRED SKILLS

- Bachelor's Degree in Computer Science, Engineering or related field
- Experience creating and executing various test plan scenarios
- Experience using bug/work tracking software (Jira, TFS, VSTS, ...)
- Familiarity with software development life cycle and best practices
- Test automation experience
- Some Development experience in modern languages (C#, .NET, Java)
- Basic knowledge of SQL
- Boundary (BVA), Regression, Negative, Performance, and Load testing
- Write test plans and test cases
- Attention to detail

NICE TO HAVE

- Microsoft Stack Testing Tool experience
- Other software development technology experience (HTML, Javascript, ...)
- SQL Server or other relational database experience

WHY IS ACUITY BRANDS A GREAT PLACE FOR SOFTWARE DEVELOPMENT?

- Our software team is a strategic part of the direction of our company
- Our company is a very profitable market leader and provides financial stability
- You will work with highly talented, fun and supportive teams
- We believe in a healthy work/life balance
- We produce quality software that you can be proud of
