

Security Engineer, Platform Architecture

Conyers, GA- REF #2339

OUR TEAM

Acuity Brands is the North American market leader and one of the world's leading providers of innovative lighting systems. Our LED lights are computing, sensing, network connected platforms, and everywhere there are people, there are lights. We are perfectly positioned to enable the world of IoT, and we have plenty of awesome projects to work on! We are driving the industry's transformation to smart lighting; redefining how people live, work and play.

ABOUT THE ROLE

We're seeking talented and enthusiastic Security Engineers who will be responsible for determining the core cyber-security standards for IoT systems development. You will research and evaluate vulnerabilities, attack vectors, and associated risks to determine which ones are relevant to our systems. You will also evaluate and recommend technologies related to cyber-security detection and/or prevention and assist in the definition of standard work for systems software development with an emphasis on security and network protocols.

WHAT YOU WILL DO

- Determine the core cyber-security standards for Web and IoT systems development across all of ABTS.
- Research and evaluate vulnerabilities, attack vectors, and associated risks to determine which ones are relevant to our systems.
- Evaluate and recommend technologies related to cyber-security detection and/or prevention.
- Assist in the definition of standard work for systems software development with an emphasis on security and network protocols. Acts a mentor to software developers in all aspects of security.
- Participate in the architecture of applications including database design, process flow, networking, cloud infrastructure, security and appropriate technology use.
- Provide training classes and/or material to developers and project managers when appropriate.
- Participate in interviews and assessments of technology candidates.
- Continuous learning and researching in security related trends.
- Attend software technology conferences and events.

ABOUT YOU

- You are passionate and optimistic.
- You are Innovative. You challenge assumptions.
- You encourage those around you to create their best work.
- You work for the best interest of the group at all times.
- You have unwavering personal integrity and work ethic.
- You are proactive.
- You graciously give and receive feedback
- You buy into the scrum methodology, and demand a project oriented, collaborative, and very positive environment.

WHAT'S IN IT FOR YOU

- The chance to work on meaningful projects aspiring to improving people's lives

- Great equipment including 4k monitors MacBooks or Surface Books / Surface Pros
- 4-Day work week (4-10, also 5-8 available, if preferred – we are flexible)
- Casual dress code (we are talking shorts!)
- Creative and collaborative environment
- Company paid sports leagues and wellness program
- On-site game room (ping-pong and Xbox)
- Free coffee and tea
- Commuter shuttle bus (limited areas)
-

And now the ordinary benefits:

- Health, Dental, Vision, Life, AD&D, 401K, HSA Accounts, Stock Purchase Plans
- and more!

REQUIRED SKILLS

- Bachelor's Degree in Computer Science (CS) or equivalent
- 3+ years experience in the security field
- Web based Security, IoT Security, Networking Protocols
- Investigate, evaluate and determine cyber-security risks and appropriate mitigations
- Communication skills to create documentation, videos and conduct training classes
- Ability to conduct architecture security reviews and define standard system security architectures

NICE TO HAVE

- Some software code knowledge and application testing experience is a plus.

WHY IS ACUITY BRANDS A GREAT PLACE FOR SOFTWARE DEVELOPMENT?

- Our software team is a strategic part of the direction of our company
- Our company is a very profitable market leader and provides financial stability
- You will work with highly talented, fun and supportive teams
- We believe in a healthy work/life balance
- We produce quality software that you can be proud of
