

UI Designer, Software Engineering

Multiple Locations - REF# NONE ACTIVE

OUR TEAM

Acuity Brands is the North American market leader and one of the world's leading providers of innovative lighting systems. Our LED lights are computing, sensing, network connected platforms, and everywhere there are people, there are lights. We are perfectly positioned to enable the world of IoT, and we have plenty of awesome projects to work on! We are driving the industry's transformation to smart lighting; redefining how people live, work and play.

ABOUT THE ROLE

We're seeking talented and enthusiastic UI Designers, with experience developing user interface designs for a variety of target environments, including web and mobile. You would be responsible for designing user interfaces from conceptual mock-ups through high fidelity designs. Working with product owners, end users, and development teams, you would understand requirements and provide exceptional user experiences. Also, you would work with other UI and UX professionals to create and maintain shared processes, tool recommendations, and documents like Style Guides.

WHAT YOU WILL DO

- Collaborate with project managers, developers, and business analysts to design innovative solutions for complex applications
- Create storyboards, wireframes, and user flows to effectively communicate interaction and design ideas
- Assist in creating design standards, best practices, and guidelines for web and mobile applications
- Research trends, techniques, and technologies to stay up-to-date on the latest developments in User Interface and User Experience
- Participate in employee recruiting and selection
- Occasional travel possible

ABOUT YOU

- You are passionate and optimistic.
- You are Innovative. You challenge assumptions.
- You encourage those around you to create their best work.
- You work for the best interest of the group at all times.
- You have unwavering personal integrity and work ethic.
- You are proactive.
- You graciously give and receive feedback
- You buy into the scrum methodology, and demand a project oriented, collaborative, and very positive environment.

WHAT'S IN IT FOR YOU

- The chance to work on meaningful projects aspiring to improving people's lives
- Great equipment including 4k monitors MacBooks or Surface Books / Surface Pros
- 4-Day work week (4-10, also 5-8 available, if preferred – we are flexible)
- Casual dress code (we are talking shorts!)

- Creative and collaborative environment
- Company paid sports leagues and wellness program
- On-site game room (ping-pong and Xbox)
- Free coffee and tea

And now the ordinary benefits:

- Health, Dental, Vision, Life, AD&D, 401K, HSA Accounts, Stock Purchase Plans
- and more!

REQUIRED SKILLS

- Passionate about UI/UX design and trends
- Eager to learn and improve your skills and apply new techniques
- Great at problem solving and finding creative solutions to complex issues
- Fluent in clearly communicating ideas and providing quality work
- Bachelor's Degree – MIS, Computer Science, or equivalent
- Experience in creating wireframes/user flows for both mobile and web
- Experience creating responsive designs that scale
- Excellent visual design skills with sensitivity to user-system interaction
- Up-to-date with the latest UI trends, techniques, and technologies
- Proficiency in Photoshop, Illustrator, JustinMind, Sketch or similar visual design tools

NICE TO HAVE

- Experience working in an Agile/Scrum development process
- Front-end design skills (HTML, CSS, JavaScript)
