#### **OUR TEAM**

Acuity Brands is the North American market leader and one of the world's leading providers of innovative lighting systems. Our LED lights are computing, sensing, network connected platforms, and everywhere there are people, there are lights. We are perfectly positioned to enable the world of IoT, and we have plenty of awesome projects to work on! We are driving the industry's transformation to smart lighting; redefining how people live, work and play.

### **ABOUT THE ROLE**

We're seeking talented and enthusiastic Front-End Application Engineers whose primary responsibility is in creating the browser-side/front-end of web applications. Additional responsibilities include participation in project time/task estimation, code and architecture reviews, documentation of system architecture and a supporting role for all phases of the development life-cycle (project definition, process mapping, architecture, coding, acceptance testing, installation, turnover to support, etc.). As an associate on our team, you'll be a key player in helping to design and realize new features, as well as improving existing tools through new and refactored application logic.

#### WHAT YOU WILL DO

- Understand user requirements and translate the requirements to web applications
- Build and improve web applications in emerging IoT marketplaces
- Participate in product reviews, helping to maintain high levels of quality for application releases
- Interact with project managers, UI designers, software engineers, and other applications developers
- Utilize Agile/Scrum methodologies for software development

## **ABOUT YOU**

- You are passionate and optimistic.
- You are Innovative. You challenge assumptions.
- You encourage those around you to create their best work.
- You work for the best interest of the group at all times.
- You have unwavering personal integrity and work ethic.
- You are proactive.
- You graciously give and receive feedback
- You buy into the scrum methodology, and demand a project oriented, collaborative, and very positive environment.

#### WHAT'S IN IT FOR YOU

- The chance to work on meaningful projects aspiring to improving people's lives
- Great equipment including 4k monitors Surface Books / Surface Pros or MacBooks
- 4-Day work week (4-10, also 5-8 available, if preferred we are flexible)
- Casual dress code (we are talking shorts!)
- Creative and collaborative environment
- Company paid sports leagues and wellness program
- On-site game room (ping-pong and Xbox)
- Free coffee and tea
- Commuter shuttle bus (limited areas)

# And now the ordinary benefits:

- Health, Dental, Vision, Life, AD&D, 401K, HSA Accounts, Stock Purchase Plans
- and more!

#### **REQUIRED SKILLS**

- Ability to understand logic and how programming operations can transform data over time
- Familiarity with database concepts, SQL queries, joins and programming
- Ability to breakdown visual designs into primitives for reconstruction into production layouts
- Excellent problem-solving, analytical and investigative skills
- Competent fluency in HTML & CSS
- Familiarity with JavaScript\TypeScript and their relative strengths & weaknesses
- Excellent written and oral communication

### **NICE TO HAVE**

- Build/release management, including hands on experience executing continuous integration workflows
- Experience working with a team of like-minded individuals
- Proficiency in using Microsoft Visual Studio Team Services

# WHY IS ACUITY BRANDS A GREAT PLACE FOR SOFTWARE DEVELOPMENT?
